EDUCATION

Northeastern University

Candidate for Bachelor of Science in Computer Science

Awards: Dean's List (F25, SP26)

Relevant Coursework: Program Design & Implementation II, Intro to Databases, Algorithms, Computer Systems, Foundations of Data Science, Logic and Computation, Foundations of Cybersecurity

Boston, MA

Graduation: April 2029

GPA: 3.75 / 4.00

TECHNICAL SKILLS

Languages: Python, Java, C#, Swift, HTML/CSS, JavaScript, TypeScript, OCaml, SQL, C

Frameworks & Libraries: React, Tailwind, Flask, SwiftUI, Unity, Prisma, NumPy, Pandas, Beautiful Soup

Tools & Platforms: Git, Docker, Claude Code, Vercel, Vim, Postman, JUnit, VS Code, Xcode

Interests: Hiking, Boulderling, Pickleball, Horror Movies, Thrifting, NBA, Traveling

EXPERIENCE

Software Engineer

Northeastern Electric Racing

Sep. 2025 – Present

Boston, MA

- Designed a sidebar on [FinishLine](#) that guides members, judges, and guests through team structure, projects, divisions, and sponsors via conditionally rendered menu items and custom React hooks for data fetching
- Resolve maintenance tickets addressing recurring bugs and UI/UX issues across FinishLine, including making calendar event end times default to an hour after the start, improving overall usability for 200+ team members
- Added a TypeScript/Express endpoint (route, controller, service) that lets admins edit the site's glossary explaining internal vocabulary to guests, with permissions and soft-delete checks

Software Developer

Sandbox at Northeastern

Sep. 2026 – Present

Boston, MA

- Work in Northeastern's student-led software consultancy, building free software for clients such as the Museum of Fine Arts Boston and Khoury College of Computer Sciences, and Northeastern's Student Government Association
- Contribute to [SARGE](#), a platform that combines online coding assessments with applicant tracking and evaluation
- Implemented a stackable filter for the positions dashboard, allowing recruiters to narrow down active positions

Computer Science Tutor

Northeastern University Peer Tutoring

Jan. 2026 – Present

Boston, MA

- Instructed students in discrete structures, including combinatorics, counting principles, and probability theory
- Prepare students for codewalks by developing their ability to read, analyze, and articulate their own code, supplemented with personalized practice on iterators, wrappers, and dictionaries
- Teach CS 2100 topics such as object-oriented design principles and unit testing to students on a weekly basis, tailoring each session based on the student's assignment, lab, and exam needs

Teaching Assistant, Discrete Structures

Khoury College of Computer Sciences

Jun. 2026 – Aug. 2026

Remote

- Hosted office hours twice a week for 78 students on topics including logic, set theory, and writing proofs
- Coordinated with a team of eight TAs to split grading, calibrate rubrics, and deliver individualized feedback on homework and exams within a fixed weekly schedule

PROJECTS

Sunsetology | React, Tailwind, Python, Flask

Jan. 2026 – Present

- Developed a full-stack web app that predicts the quality of sunsets for any location from a live weather API
- Implemented a Flask REST API that fetches hourly forecast data from Tomorrow.io and interpolates weather information to the exact minute of the sunset
- Designed a custom scoring system using weather metrics such as cloud cover and humidity to score the quality of a sunset, and displayed those metrics on a day-card to visualize its readings if it met the target values
